ABOUT US

RAP(Rover Auto Parts), a Southern California-engineered automotive lighting leader with over 23 years of expertise, drives innovation through its Santa Fe Springs-based R&D center and global ISO-certified manufacturing.

The brand specializes in precision-engineered lighting systems developed via 12-24 month cycles using CAD/CAM technology, 3D prototyping, and exhaustive validation protocols -- including SAE/ DOT FMVSS 108 compliance, thermo-hygrometer endurance tests, and 8+ physical stress trials. Complementing our capabilities, industry bench-marks demonstrate how RAP's patented optical technologies deliver glare-free beam control with IP67-rated sealing for enhanced durability, while our E-mark certification expands global reach. RAP's multi-shot injection molding and electro-plating processes yield cutting-edge solutions, backed by technical support and warranty programs. As pioneers advancing plug-and-play functionality and extreme-temperature resilience (−40°C to 80°C).

RAP represents the engineering backbone power-ing tomorrow's performance lighting ecosystems.
